# IEEE Technology Time Machine (TTM) – May 23-25, 2012 in Dresden (Germany)

Ladies and Gentlemen, dear colleagues,

We would like to call your attention to an event that is taking place in the City of Dresden at the end of May:

## IEEE Technology Time Machine (TTM) – Symposium on Technologies Beyond 2020

The symposium Technology Time Machine (TTM) unites around 300 CEOs, CTOs, CIOs, and leading scientists from all over the world at Europe's leading cluster for micro- and nanoelectronics, Silicon Saxony. All of them are linked by their daily work: the development of intelligent future technologies.

The event's declared objective is to enable interdisciplinary discussions about societal impacts of new technologies and to trigger an extensive discourse on the contribution future technologies can make in the context of the major global challenges of our times.

**Hot topics include:** Collective Intelligence, Smart Power, Internet of Things (Cyber Physical Systems), Advanced Medical Technologies, Smart Transportation and Logistics, Networks for Future Applications, Electronics beyond CMOS, Cloud Computing and Security.

**Key speakers include:** Google, IBM, DLR, NASA, Nokia Siemens Networks, Alcatel-Lucent, Telx, SAP, Actix, ZMDI, Kofler Energies, Siemens, Enel, Associated Press, Vodafone, Infineon, Tata Motors, Giesecke & Devrient, Sensys Networks, Oracle, EIT ICT Labs, Foster+Partners, Volkswagen, National Instruments, VDE and Fraunhofer HHI, FOKUS, IIS are represented in Dresden by their executives, managers and technological masterminds.

Technology Time Machine is an annual international symposium. In 2011 it was hosted by the City of Hong Kong.

### About IEEE

The Institute of Electrical and Electronics Engineers (IEEE) based in New York City with its more than 400,000 members in more than 150 countries is the world's largest professional association of engineers of the fields electronics and information science. The association is divided in numerous Societies that focus on the whole range of electronics and information technology and globally promote the standardization of technologies, hardware and software. In addition, IEEE is host of conferences and publisher of numerous professional journals. IEEE's scientific articles in journals or contributions to conferences are of excellent technical quality. With publications such as the journal IEEE Spectrum the association also promotes interdisciplinary information and the discourse on the societal impacts of future technologies. - We are interested in the topics of this event and are looking forward to additional information.
- We are interested in an interview with Prof. Dr.-Ing. Gerhard Fettweis, Vodafone Chair Mobile Communications Systems, Technische Universität Dresden.
- We would like to visit this event.
- Unfortunately, we are not able to visit this event. However, please send us additional information.
